

Shell Oil Company, Guangdong Province, China

Fibrelite's Fibreglass Tank and Dispenser Sumps Specified by a Leading Oil Company in China

Site under construction

Fibrelite tank sumps (S14-390) being installed

Project Overview

Fibrelite's vacuum testable fibreglass tank sumps and dispenser sumps have been specified by a leading oil company in China. As part of a new to industry construction program Fibrelite used its high-technology RTM production methods to create a range of high-quality fibreglass equipment for the growing Chinese market.

Testable Containment, Consistent Structural Integrity

Fibrelite's high-quality one-piece moulded tank sumps have a smooth finish for easy handling during installation. Designed and manufactured to withstand high groundwater pressure after installation for the lifetime of the site.

Vacuum tested tank sumps

Fibrelite's Gilbarco/China EL-GC-To5403-SH10 dispenser sumps

Highly Effective in Preventing Water Ingress

Many areas have persistently high water tables and Fibrelite's vacuum testable tank sumps have proved highly effective in preventing water ingress and subsequent damage to tank top equipment and possible water contamination to the fuel.

Products were supplied by OPW customer service center, contact Ms. Sandy Chen at Sandy.Chen@opwglobal.com or 0086-512-69567071 for local enquiries.

Long Working Life – Tried and Tested Reliable Performance

Fibrelite's wide range of dispenser sumps offers a great alternative to polyethylene sumps. The strong rigid structure will not deflect under groundwater pressure. The simple two piece design provides a large working space to install pipework inside the sump before the top section is installed.
