

# Z Energy Oil Company, Auckland, New Zealand

Fibrelite Supply Tank Sumps and Interstitial Monitoring Sumps to Z Energy in Auckland, New Zealand

Recently upgraded site with Fibrelite's 1020mm covers (FL100) and 300mm covers (FL120)

## Project Overview

Fibrelite's vacuum testable fibreglass tank sumps and 25 tonne rated composite covers have been specified by Z Energy Oil Company in New Zealand.

## Testable and Watertight

Fibrelite's high-technology RTM production methods are used to create a range of high-quality fibreglass equipment which is both testable and watertight.

Fibrelite's 1020mm sealed cover with easily removable central dip port

## Testable Containment, Consistent Structural Integrity

Fibrelite's high-quality one-piece moulded tank sumps have a smooth finish for easy handling during installation. Designed and manufactured to withstand high groundwater pressure after installation for the lifetime of the site.

Products were supplied by Fibrelite's exclusive distributor Petroleum Equipment Services in Auckland. Please contact Chris Davis at [chris@pes.co.nz](mailto:chris@pes.co.nz) for local enquiries.
